PHILIP OLISAEMEKA NWOKEDI

PROFILE

I am a skilled Frontend Developer with over 4 years of professional experience crafting high-quality web applications. Proficient in leading frameworks like React.js and Next.js, I excel in API integration and creating engaging, interactive user experiences using tools like GSAP and Framer Motion. As a recent Electrical Engineering graduate with a strong self-taught foundation in Computer Science and Mathematics, I bring a unique blend of analytical rigor and creative problem-solving to every project.

EDUCATION

React Developer (Contract)
Joy Inc.
December 2024 – Present

https://withchude.com

Successfully enhanced and optimized an existing React.js website by implementing new features, fixing bugs, and addressing performance bottlenecks caused by non-standard practices of the previous developer. Conducted code refactoring and optimization to improve maintainability, scalability, and efficiency. Delivered the project within a month, exceeding client expectations and ensuring a seamless user experience.

Frontend Developer (Contract)
Natesa Consulting
March 2024 – June 2024

https://natesaconsulting.com

Built the user interface of the company's website, designed and implemented the architecture for the headless Content Management System that powers most of the content on the website, build the backend system including but not limited to user authentication, registration, and a QR code scanning system.

Frontend Developer
Anambra State Investment Promotion and Protection Agency (ANSIPPA)
August 2023 – Present

https://ansippa.com.ng

Implemented the redesign of the agency's website from scratch using React.js and other web development tools, move the agency's Content Management System to a more modern and secure platform, Built the backend system for event registration and event attendance authentication.

Creative Frontend Engineer
The Garage
April 2023 – February 2024

https://thegarage.ng

Worked with two colleagues (a UI/UX Designer and a frontend developer) in building the company's waitlist app using React and GSAP. The website also used subscribed user to newsletter using Beehiiv newsletter platform.

Frontend Web Developer
Adsgate
October 2021 – February 2023

https://adsgate.org

Built frontend and CMS platforms for Adsgtae – a talent hiring platform for African freelancers. Implemented Paystack as the medium for making payments.

Laravel Developer (Contract)
All Nigerian Youths Debate Championships (ANYDC)
March 2022

https://anydc.xyz

Developed the events website for the debate championship using HTML and CSS for the frontend and also used Laravel to build the API for user registration and authentication.

Fullstack Developer
Learnclax
February 2019 – August 2021

https://learnclax.com

I was part of the team that built and maintained the website. Build the website with HTML, CSS and jQuery. The backend was built with pure PHP and MySQL.
